- Developed services to integrate with a partner firm through REST API in Nodejs .
- Developed services for their in-house panels e.g bulk-upload which uploaded products from a excel to the system.
- Performed a number of small tasks like scripting, web scraping, etc.

Omic HealthCare Mumbai, India
App Development Intern *Feb 2019 - April 2019*
- Developed a Cross-Platform (android and IOS) app for their clients using React-Native and Firebase.
- Created a way to receive offline medicine remainders by chaining Firebase's push Notification to system offline notifications.
- Designed the UI for the some of the screens.

PROJECTS

- **Health Monitor App "Arogya" :** Our team submission for SIH grand finale 2020, a Health monitoring application at low bandwidth, so that remote patients would be kept in check virtually. Made an app in React-Native that shows vitals of the patients using webrtc.
- **Canteen Automation Android App :** Order from the canteen on your phone! This was a my project as a mentee in Unicode. Made the app in a team of 4, also made design mockups of half of the screens.
- **QuotesWall :** React-Native app for setting wallpapers of random images with random quotes overlaid on them. Scrape's random images from reddit

CO-CURRICULAR

Unicode Mumbai, India
App Development *June 2018 - Present*
- **Mentee (till June 2019)** Worked in a team of 5 to develop canteen automation app .
- **Mentor (Currently)** mentoring 2 teams of 4 juniors each, for app development in react native

CERTIFICATES

- **Algorithmic-toolbox** UC San Diego on coursera.
- **Data structures** UC San Diego on coursera.
- **Graphs** UC San Diego on coursera

PROGRAMMING SKILLS

- **Languages** : JavaScript, C, C++, Java, SQL
- **Technologies** : Android, ReactNative, Nodejs, MongoDB, Git.
- **OS** : Linux, Windows
